Dear Mr. Larsen,

Thank you for letter of November 4, 2013 responding to the State Environmental Policy Act (SEPA) public comment period for the Soos Creek Hatchery Redevelopment. We concur with your sense of the importance of the role of this hatchery in sustaining salmon and steelhead populations.

WDFW is continuing the work on the other permits required for this project and remains hopeful that construction can begin during the coming year.

Sincerely,
Douglas

To whom it may concern,

I would just like to say that I am really pleased to see this project high on the list. It is a very productive hatchery and provides a lot of fish to the Washington fishery. I have seen it on the list for a number of years please make sure it stays there this year. For the past ten years it seems they have just barely been able to keep things going at the Soos Creek facility. With the proposed improvements it should really help assure a good future. With so many opportunities being lost this is a bright spot and provides many people with opportunity for both salmon and steelhead. Again as a sportsman who cares I want to encourage forward movement on this project.

Thanks Rob Larsen
